**Average Spotify Song Metrics From 2010 to 2019**

Hover over this visualization and learn how various Spotify song metadata, specifically, BPM, energy, and danceability varied over the range of 2010 to 2019.

Song Metrics for Top 10 Most Streamed Spotify Artists
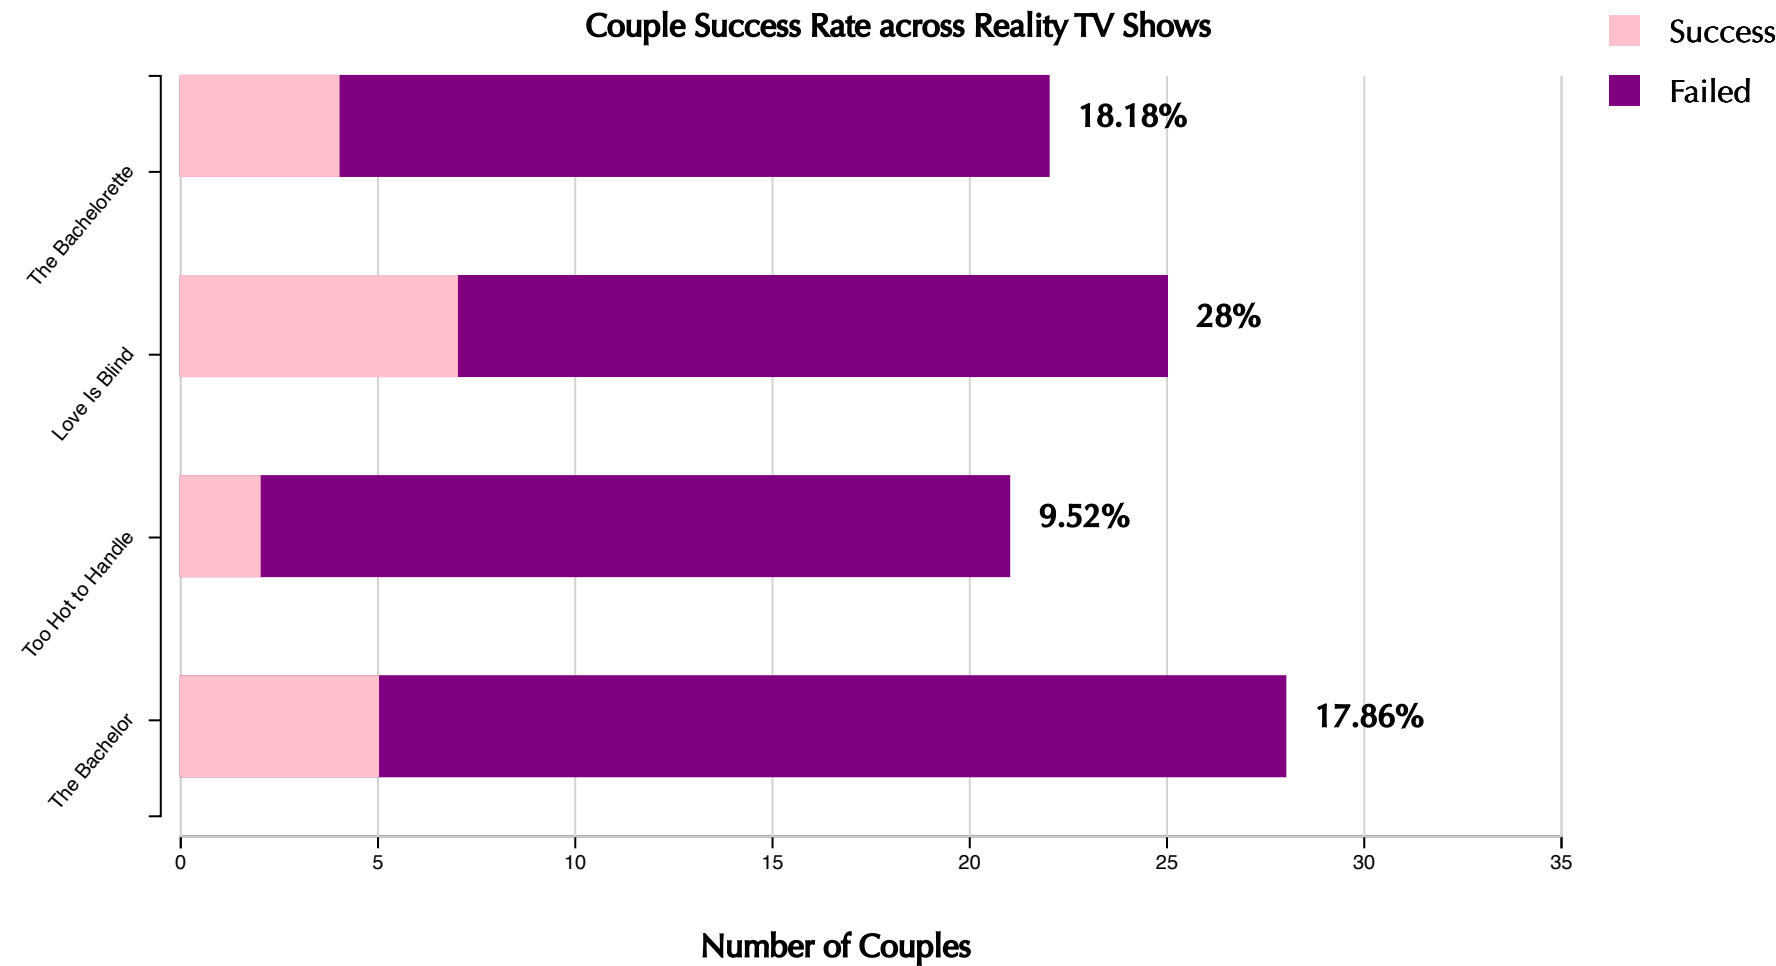

BPM

Energy

Danceability

Click the button selectors to view the same 3 song metadata metrics -- bpm, danceability, and energy -- for each of the top 10 streamed Spotify artists in 2013.

Project 1: Samhita (sr854), Meera (mr828), Neha (nk442), Vaishnavi (vv92)

A Deeper Dive Into the Success of America's Favorite Reality TV Shows
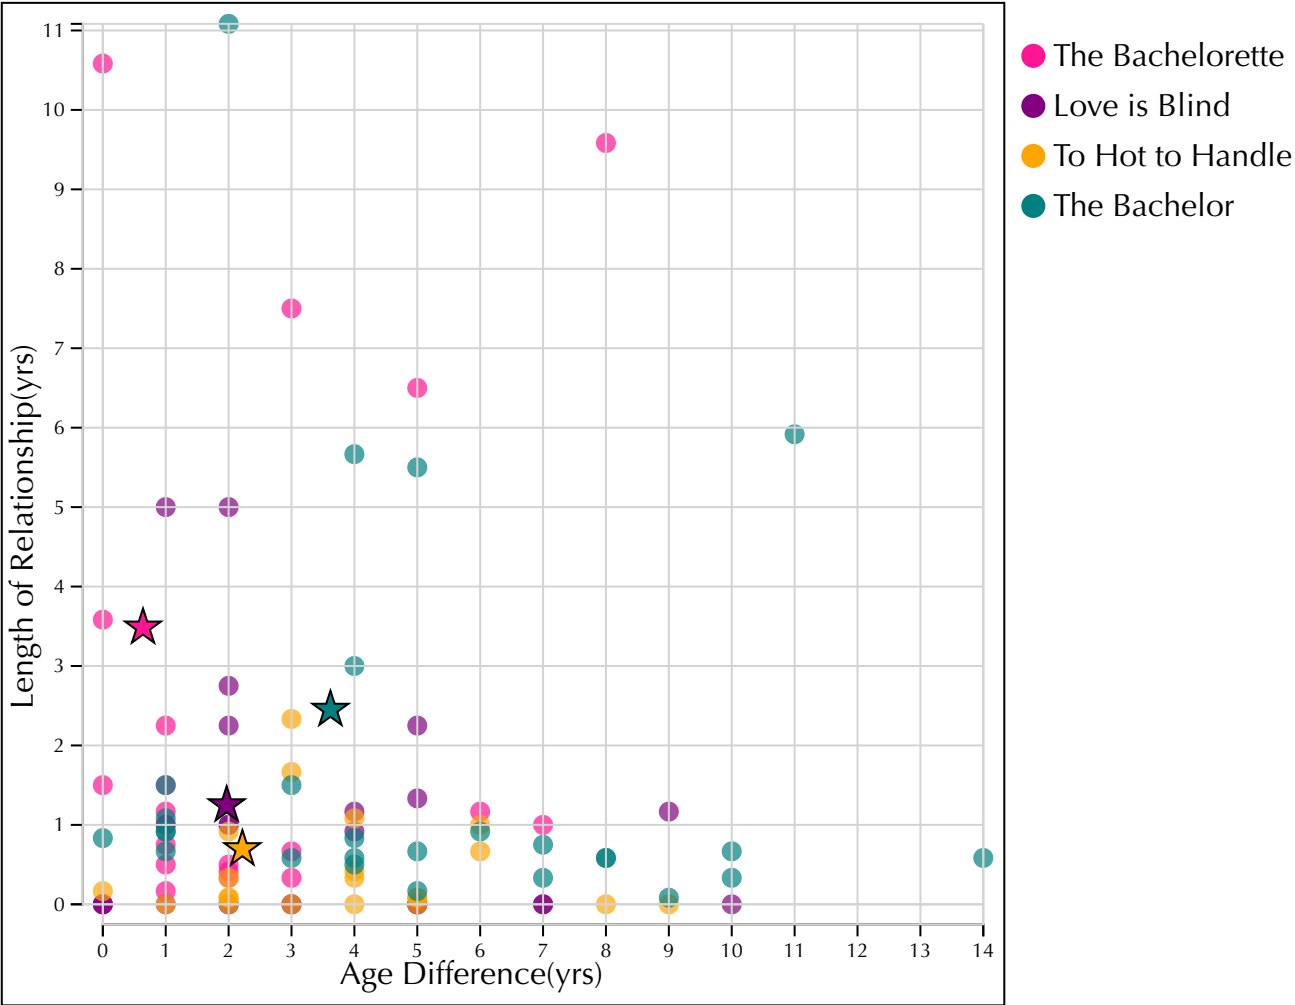

Visualization 1

Here, we can see that Love is Blind and The Bachelorette are the most successful shows, as defined by the highest percentage of couples that are still together from the seasons.

Visualization 2

Here, we see that, on average, couples with smaller age differences tend to have longer relationships. From the averages for each show we also see that The Bachelorette and The Bachelor have couples with longer relationships, on average.

The Effect of Age Difference(yrs) on Relationship Length(yrs)

Our visualizations explore success rate across reality TV shows, and the relationship between age difference and relationship length. Overall, the Bachelorette had the second-highest success rate of 18%, and produces relationships with the longest length and smallest age difference of the four shows. This suggests a correlation between minimal age difference and relationship success.
